JOURNAL OF HEAT TRANSFER

Volume 84, 1962

The Journal of Heat Transfer for 1962 was issued quarterly in February, May, August, and November.

Issue	Page Numbers
February	1–96
May	97–192
August	193–272
November	273–396

A

Acoustics. *See also* Vibration
Local heat-transfer coefficient around a heated horizontal cylinder in an intense sound field 245
Albers, L. U.
Thermal radiation characteristics of cylindrical enclosures 73
Atom Concentrations. *See* Plasma

B

Back, L. H.
Effectiveness and heat transfer for a turbulent boundary layer with tangential injection and variable free-stream velocity 235
Numerical approximation of the convective boundary condition 89
Velocity and temperature profiles in turbulent boundary layers with tangential injection 45
Baxter, D. C.
Fusion times of slabs and cylinders 317
Beck, James V.
Thermocouple temperature disturbances in low conductivity materials 124
Becker, K. M.
Influence of a radial temperature gradient on the instability of fluid flow in an annulus with an inner rotating cylinder 106
Measurements of diabatic flow in an annulus with an inner rotating cylinder ... 97
Belcher, R. L.
Unsteady-state heat transfer in solids with radiation at one boundary 266
Bergles, A. E.
Influence of temperature difference on the turbulent forced-convection heating of water 268
Blanton, Roy W., Jr.
Thermal radiation energy exchange shape factors for non-Lambertonian surfaces 271
Bloom, Martin H.
Axially symmetric laminar free mixing with large swirl 370
Bodoia, J. R.
Development of free convection between heated vertical plates 40
Boiling. *See also* Boundary Layer
Effect of subcooled liquid on laminar film boiling 149
Forced-convection film boiling on a flat plate with uniform surface heat flux 395
On the size range of active nucleation cavities on a heating surface 207
Transient pool boiling of water on a vertical surface with a step in heat generation 217
Boundary Layer
Analysis of film boiling on vertical surfaces 55
Effectiveness and heat transfer for a turbulent boundary layer with tangential injection and variable free-stream velocity 235
Laminar free convection boundary-layer perturbations due to transverse wall vibration 225
Transient pool boiling of water on a vertical surface with a step in heat generation 217
Velocity and temperature profiles in turbulent boundary layers with tangential injection 45
Branstetter, J. Robert
Empirical equation for the net radiant heat flow between parallel tungsten plates 264
Brown, W. G.
Combined free and forced-convective flow in vertical circular tubes—experiments with water and oil (D) 345
Brown, W. S.
Forced convection heat transfer from a uniformly heated sphere 133
Brunner, M. J.
Effects of Hall and ion slip on the electrical conductivity of partially ionized gases for magnetohydrodynamic re-entry vehicle application 177
Bubbles
Entrance effects in a two-phase slug flow 29

C

Carbon Dioxide
Laminar flow heat transfer for variable physical properties 157
Catalysis
Diffusion and chemical surface catalysis in a low-temperature plasmajet—the determination of atom concentrations in nonequilibrium supersonic streams of activated nitrogen 386
Cess, R. D.
Effect of subcooled liquid on laminar film boiling 149
Forced-convection film boiling on a flat plate with uniform surface heat flux 395
Chang, Paul K.
Local heat-transfer coefficient around a heated horizontal cylinder in an intense sound field (D) 250
Chemical Kinetics. *See* Gases
Cheng, P.
Local heat-transfer coefficient around a heated horizontal cylinder in an intense sound field 245
Clark, J. A.
Laminar free convection boundary-layer pertubations due to transverse wall vibration 225
Coats, Keith H.
Heat conduction in the infinite region exterior to a rectangle 327
Cobble, M. H.
Nusselt number for flow in a cone 264
Computers
Fusion times of slabs and cylinders 317
Conduction. *See* Heat Transfer
Convection. *See* Heat Transfer
Cooling Systems
Calculation of density changes in boiling coolants 94
Cylinders. *See* Fusion, Heat Transfer

D

Davenport, M. E.
Thermocouple attachment to a direct-current heater 187
Davidson, J. F.
Entrance effects in a two-phase slug flow (D) 39
Deaver, F. K.
Heat transfer from an oscillating horizontal wire to water 251
Depew, C. A.
Heat transfer to air in a circular tube having uniform heat flux 186
Dickerman, P. J.
Heat transfer from partially ionized gases in the presence of an axial magnetic field 169
Diffusion Equation. See Heat Transfer
Disks. *See* Heat Transfer
Ducts
Comparison of predicted and measured friction factors for turbulent flow through rectangular ducts 82
Heat transfer for pulsating laminar duct flow 111
Transient, laminar, combined free and forced convection in a duct 141
Dunkle, R. V.
Diffusion of heat through a disk source 265

E

Eckert, E. R. G.
Enclosure theory for radiative exchange between specularly and diffusely reflecting surfaces 294
Radiant interaction between fin and base surfaces 12
Thermal radiation characteristics of cylindrical enclosures 73
Edwards, D. K.
Radiation interchange in a nongray enclosure containing an isothermal carbon-dioxide-nitrogen gas mixture ... 1
Rapid calculation of radiant energy transfer between nongray walls and isothermal H_2O or CO_2 gas 273
Eichhorn, R.
Unsteady natural convection in the vicinity of a doubly infinite vertical plate 334
Electric Machinery
Measurements of diabatic flow in an annulus with an inner rotating cylinder ... 97
Electrical Conductivity
Effects of Hall and ion slip on the electrical conductivity of partially ionized gases for magnetohydrodynamic reentry vehicle application 177
Electrical Conductors
Thermal radiation energy exchange shape factors for non-Lambertonian surfaces 271
Emission. *See* Heat Transfer
Emissivity. *See* Heat Transfer
Enns, Mark
Comparison of dynamic models of a superheater 375

F

Fairall, R. S.
Unsteady-state heat transfer in solids with radiation at one boundary 266
Fand, R. M.
Comparison of the influence of mechanical and acoustical vibrations on free convections from a horizontal cylinder 268
Laminar free convection boundary-layer perturbations due to transverse wall vibration (D) 233
Local heat-transfer coefficient around a heated horizontal cylinder in an intense sound field 245
Films. *See* Boundary Layer
Fins. *See* Heat Transfer
Flow of Fluids. *See also* Boundary Layer, Fluid Friction, Viscosity
Axially symmetric laminar free mixing with large swirl 370
Combined free and forced-convective flow in vertical circular tubes—experiments with water and oil 339
Entrance effects in a two-phase slug flow 29
Influence of a radial temperature gradient on the instability of fluid flow in an annulus with an inner rotating cylinder 106

(D) denotes Discussion of a paper.

FLOW OF FLUIDS (*continued*)
Laminar heat transfer in tubes under slip-flow conditions 363
Rotating disk flow and mass transfer 155
FLUID FRICTION
Comparison of predicted and measured friction factors for turbulent flow through rectangular ducts 82
FRANK, IRVING
Temperature distributions in long cylindrical shells 190
FREEZING. *See* FUSION
FRICTION. *See* FLUID FRICTION
FUSION
Fusion times of slabs and cylinders 317

G

GAS-LIQUID MIXTURES. *See* FLOW OF FLUIDS
GASES
Diffusion and chemical surface catalysis in a low-temperature plasmajet—the determination of atom concentrations in nonequilibrium supersonic streams of activated nitrogen 386
Effects of Hall and ion slip on the electrical conductivity of partially ionized gases for magnetohydrodynamic re-entry vehicle application 177
Heat transfer from partially ionized gases in the presence of an axial magnetic field 169
Radiation interchange in a nongray enclosure containing an isothermal carbon-dioxide-nitrogen gas mixture 1
GIEDT, W. H.
Thermocouple temperature disturbances in low conductivity materials (D) 131
GOODMAN, T. R.
Effect of arbitrary nonsteady wall temperature on incompressible heat transfer 347
GRAY, EDWARD I.
Temperature distributions in long cylindrical shells 190
GREGG, J. L.
Radiant emission from a parallel-walled groove 270
GRIFFITH, P.
Entrance effects in a two-phase slug flow 29
On the size range of active nucleation cavities on a heating surface (D) 213
GROSH, R. J.
Heat transfer by simultaneous conduction and radiation in an absorbing medium 63

H

HARTNETT, J. P.
Comparison of predicted and measured friction factors for turbulent flow through rectangular ducts 82
HEAT-EXCHANGE EQUIPMENT. *See* STEAM SUPERHEATERS
HEAT TRANSFER. *See also* BOILING, BOUNDARY LAYER
Absorption and emission characteristics of diffuse spherical enclosures 188
Analysis of film boiling on vertical surfaces 55
Analysis of interpretation of data on thin-skinned heat-transfer models 191
Combined free and forced-convective flow in vertical circular tubes—experiments with water and oil 339
Comparison of analytical and experimental local heat fluxes in liquid-propellant rocket thrust chambers 19
Comparison of constant wall temperature and constant heat flux turbulent heat transfer 90
Comparison of the influence of mechanical and acoustical vibrations on free convections from a horizontal cylinder 268
Development of free convection between heated vertical plates 40
Diffusion of heat through a disk source ... 265
Effect of arbitrary nonsteady wall temperature on incompressible heat transfer 347
Empirical equation for the net radiant heat flow between parallel tungsten plates 264
Enclosure theory for radiative exchange between specularly and diffusely reflecting surfaces 294
Forced convection heat transfer from a uniformly heated cylinder 257
Forced convection heat transfer from a uniformly heated sphere 133
Fusion times of slabs and cylinders 317
HEAT TRANSFER (*continued*)
Heat conduction in the infinite region exterior to a rectangle 327
Heat transfer by combined forced convection and thermal radiation in a heated tube 301
Heat transfer by simultaneous conduction and radiation in an absorbing medium 63
Heat transfer for pulsating laminar duct flow 111
Heat transfer from an oscillating horizontal wire to water 251
Heat transfer from partially ionized gases in the presence of an axial magnetic field 169
Heat transfer to air in a circular tube having uniform heat flux 186
Influence of temperature difference on the turbulent forced-convection heating of water 268
Laminar flow heat transfer for variable physical properties 157
Laminar forced convection of liquids in tubes with variable viscosity 353
Laminar heat transfer in tubes under slip-flow conditions 363
Local heat-transfer coefficient around a heated horizontal cylinder in an intense sound field 245
Measurements of diabatic flow in an annulus with an inner rotating cylinder 97
Numerical approximation of the convective boundary condition 89
Nusselt number for flow in a cone 264
On the solution of the diffusion equation with a heat source 312
Radiant absorption characteristics of concave cylindrical surfaces 283
Radiant emission from a parallel-walled groove 270
Radiant interaction between fin and base surfaces 12
Radiation interchange in a nongray enclosure containing an isothermal carbon-dioxide-nitrogen gas mixture 1
Rapid calculation of radiant energy transfer between nongray walls and isothermal H_2O or CO_2 gas 273
Steady-state conduction with variable thermal conductivity 92
Temperature distributions in long cylindrical shells 190
Thermal efficiency of coated fins 279
Thermal radiation characteristics of cylindrical enclosures 73
Thermal radiation energy exchange shape factors for non-Lambertonian surfaces 271
Thermocouple temperature disturbances in low conductivity materials 124
Transient, laminar, combined free and forced convection in a duct 141
Unsteady natural convection in the vicinity of a doubly infinite vertical plate 334
Unsteady-state heat transfer in solids with radiation at one boundary 266
Velocity and temperature profiles in turbulent boundary layers with tangential injection 45
HEATING. *See* HEAT TRANSFER
HOVANESSIAN, S. A.
On the solution of the diffusion equation with a heat source 312
HSU, Y. Y.
On the size range of active nucleation cavities on a heating surface 207
HYDRODYNAMICS. *See* BOUNDARY LAYER

I

INFRARED. *See* INSTRUMENTS—TEMPERATURE
INJECTION. *See* BOUNDARY LAYER
INSTRUMENTS—TEMPERATURE. *See also* PROBES
Infrared techniques for temperature measurement in plasmajets 164
Thermocouple attachment to a direct-current heater 187
Thermocouple temperature disturbances in low conductivity materials 124
ION SLIP. *See* MAGNETOHYDRODYNAMICS

J

JEFFERSON, T. B.
Heat transfer from an oscillating horizontal wire to water 251
JETS. *See* PLASMA
JOHNSON, H. A.
Transient pool boiling of water on a vertical surface with a step in heat generation 217
JONSSON, V. K.
Absorption and emission characteristics of diffuse spherical enclosures 188
Enclosure theory for radiative exchange between specularly and diffusely reflecting surfaces 294

K

KAYE, JOSEPH
Influence of a radial temperature gradient on the instability of fluid flow in an annulus with an inner rotating cylinder 106
Local heat-transfer coefficient around a heated horizontal cylinder in an intense sound field 245
Measurements of diabatic flow in an annulus with an inner rotating cylinder 97
KEMENY, G. A.
Combined free and forced-convective flow in vertical circular tubes—experiments with water and oil 339
KOH, J. C. Y.
Analysis of film boiling on vertical surfaces 55
Comparison of predicted and measured friction factors for turbulent flow through rectangular ducts 82
Effect of subcooled liquid on laminar film boiling (D) 155
KOPPEL, L. B.
Laminar flow heat transfer for variable physical properties 157
KORST, H. H.
Effectiveness and heat transfer for a turbulent boundary layer with tangential injection and variable free-stream velocity (D) 242
KREITH, F.
Radiant absorption characteristics of concave cylindrical surfaces (D) 293

L

LAI, W.
Diffusion of heat through a disk source ... 265
L'ECUYER, M.
Comparison of constant wall temperature and constant heat flux turbulent heat transfer 90
LEMLICH, ROBERT
Heat transfer from an oscillating horizontal wire to water (D) 254
LEPPERT, G.
Forced convection heat transfer from a uniformly heated cylinder 257
Forced convection heat transfer from a uniformly heated sphere 133
Thermocouple attachment to a direct-current heater 187
LIN, S. H.
Laminar heat transfer in tubes under slip-flow conditions 363
LU, PAU-CHANG
Heat transfer for pulsating laminar duct flow (D) 122
LURIE, HENRY
Transient pool boiling of water on a vertical surface with a step in heat generation 217

M

MCCOMAS, S. T.
Comparison of predicted and measured friction factors for turbulent flow through rectangular ducts 82
MCMORDIE, ROBERT K.
Steady-state conduction with variable thermal conductivity 92
MAGEE, P. M.
Thermocouple attachment to a direct-current heater 187
MAGNETISM
Heat transfer from partially ionized gases in the presence of an axial magnetic field 169
MAGNETOHYDRODYNAMICS
Effects of Hall and ion slip on the electrical conductivity of partially ionized gases for magnetohydrodynamic re-entry vehicle application 177
MANOS, WILLIAM P.
Analysis of interpretation of data on thin-skinned heat-transfer models 191
MARTIN, T. W.
Improved computer oriented methods for calculation of steam properties (correction) 192

(D) denotes Discussion of a paper.

MASS TRANSFER
Rotating disk flow and mass transfer..... 185
